### SlotChannel

#### Splash Aqua Park and Leisure Centre, Craigieburn, VIC

Splash Aqua Park and Leisure Centre was opened in October 2017. Peddle Thorp Architects designed the state-of-the-art facility with sustainable water and energy saving initiatives. The centre attracts around 600 visitors per year with a variety of programs catering for all ages and abilities. The aquatic park comprises a 50-metre pool, learn to swim and warm water pools, two water slides, gymnasium and café. The building is part of a 12-hectare park that includes an athletics track, event spaces and play grounds.

#### Project Design Brief

Designers needed the surface area around the perimeter of the pools to be as flat and level as possible and requested a discreet, pedestrian safe drainage system that would not stand out in the pavement.

#### ACO's Solution

- Stainless steel SlotChannel

#### Benefits

- The SlotChannel outlet units are made with a tile insert top to blend in with the surrounding tiles
- The 10mm slot ensures safety for pedestrians and wheelchairs
- The SlotChannel is manufactured from stainless steel grade 316 for corrosion resistance

#### Other ACO Products Used

- Stainless steel drainage systems
- Cablemate enclosures
