ACO Stainless

The Ivy – Sydney, NSW

The Ivy is a prestigious dining and entertainment centre located in the heart of the Sydney CBD. The Ivy venue has numerous award winning restaurants, bars and event spaces.

The architects required an upmarket and sophisticated look throughout the entire complex, including the functional utility areas.

The high standard of design required materials of the highest quality to be specified. Designers chose ACO's stainless steel Heelsafe® Anti-Slip grates that are slip resistant to

R10, AS 4586. This is the national requirement for slip resistance of new pedestrian surface materials.

The stainless steel channel has a built-in fall of 1:100 to allow for efficient drainage to the outlets.

ACO's stainless steel drainage products were installed in every utility wet area throughout the Ivy complex. The areas included commercial kitchens, cool rooms, bar areas, all bathrooms, outside dining areas, balconies, courtyards and around the roof top pool.

Product Featured:

System 100 channels with Stainless Wedgewire Heelsafe® Anti-Slip grates

Other ACO Products Used:

Stainless steel channels and grates.
